15. ENDPOINT SECURITY MONITORING

DATE: 22/04/2026

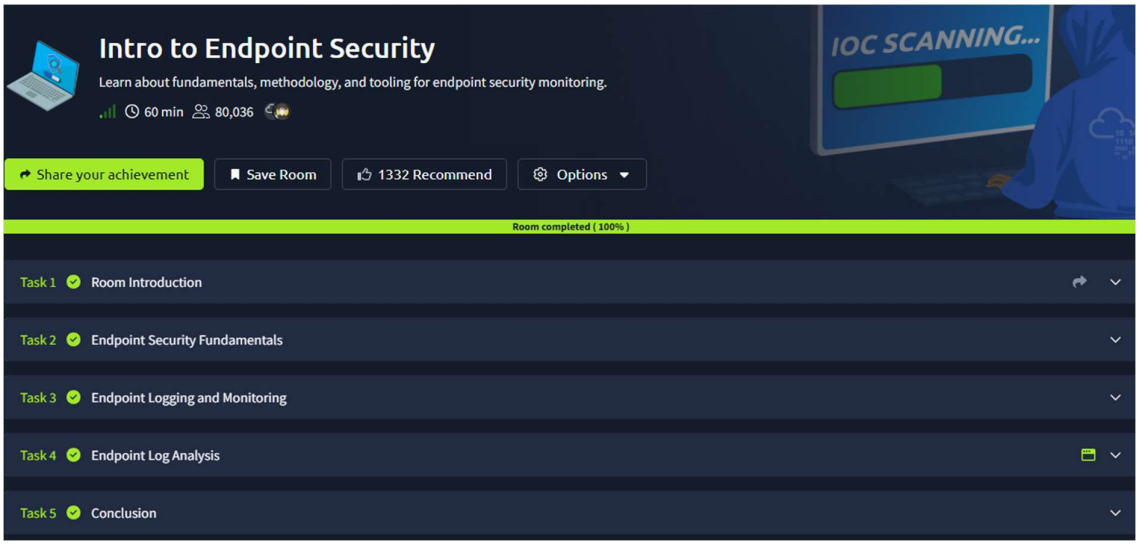
Aim:

To learn about fundamentals, methodology, and tooling for endpoint security monitoring.

Procedure:

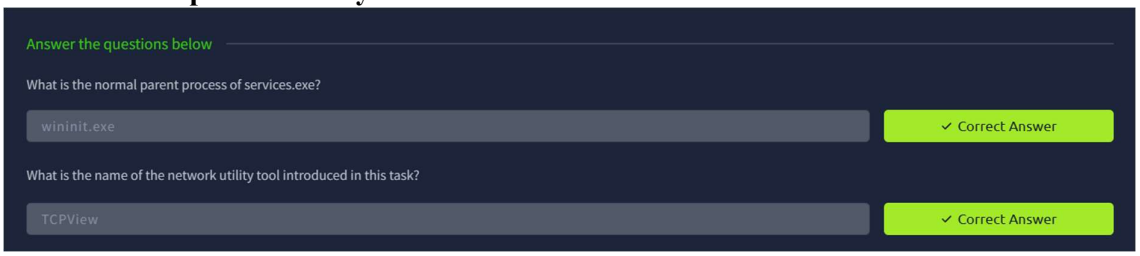
1. Log into TryHackMe and open the Intro to Endpoint Security room.
2. Study the fundamentals of endpoint security and its importance.
3. Understand common threats targeting endpoints such as malware and exploits.
4. Learn methodologies for monitoring and securing endpoint devices.
5. Explore tools used for endpoint detection and response.
6. Complete the tasks and answer the questions in the room.
7. Review the summary and confirm completion.

Tasks:



TASK 1- Room Introduction

TASK 2 – Endpoint Security Fundamentals



TASK 3 – Endpoint Logging and Monitoring

Answer the questions below

Where do the Windows Event logs (.evtx files) typically reside?

C:\Windows\System32\winevt\Logs ✓ Correct Answer

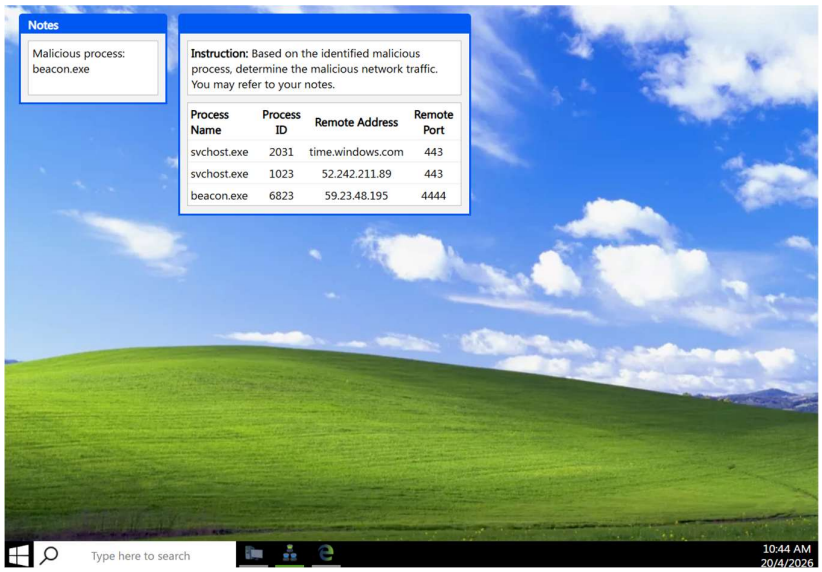
Provide the command used to enter OSQuery CLI.

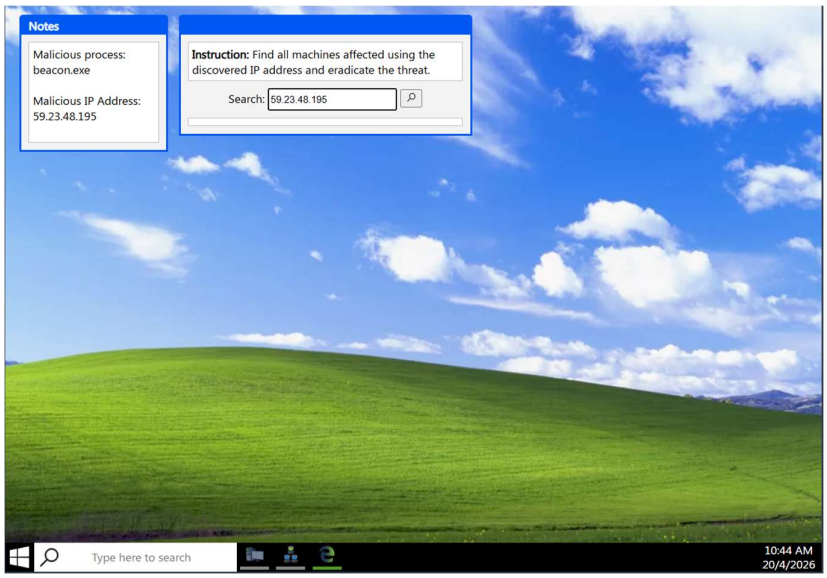
osqueryi ✓ Correct Answer

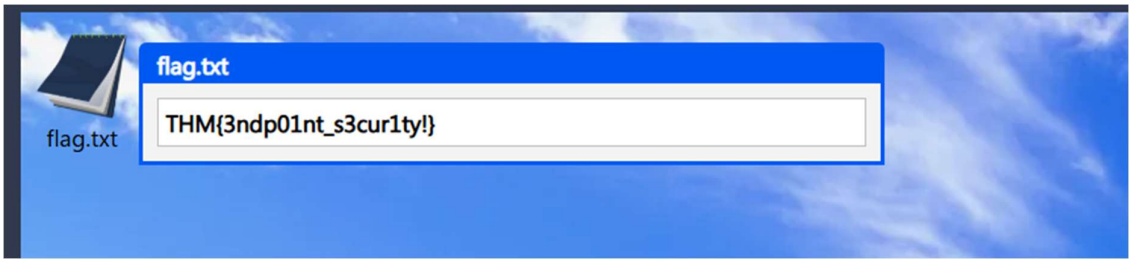
What does EDR mean? Provide the answer in lowercase.

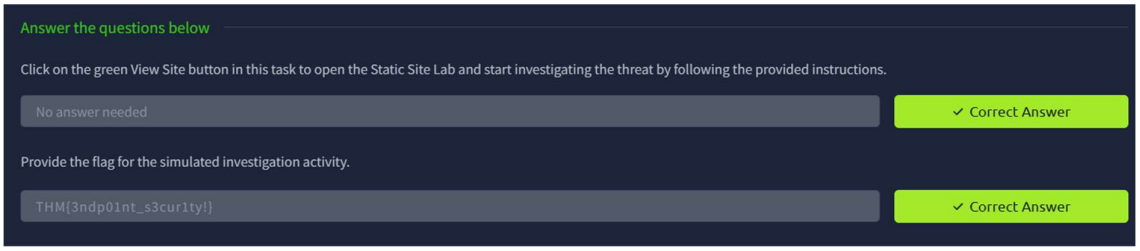
endpoint detection and response ✓ Correct Answer

TASK 4 – Endpoint Log Analysis









TASK 5 - Conclusion

Result:

Thus the TryHackMe room “Intro to Endpoint Security” was completed successfully.
